INFORMATION SECURITY ANALYST

Purpose of the job

The main responsibility for an Information Security Analyst includes monitoring, detecting, analyzing, and responding to cybersecurity incidents using a variety of security tools and processes. They also ensure that all computing assets are compliant with deployed security tools to ensure cyber resilient Infrastructure.

Key Duties, Responsibilities and Accountability

- Monitor security alerts and events from our SIEM and other security tools.
- analyze suspected intrusions, confirm attacks, and assess impact, escalating serious incidents per the incident response plan.
- Perform initial triage of alerts and escalate when necessary.
- Document incidents, investigations, and actions taken.
- Participate in projects and changes related to security monitoring
- Participate in implementation of FinSOC, as well as managing and monitoring FinSOC alerts.
- Work closely with IT, security teams, and other departments when issues arise.
- Participate in the development, customization, and improvement of SOC processes, playbooks, and incident handling procedures.
- Stay updated on security threats, trends, and industry best practices.
- Conduct regular vulnerability scans
- Review all computing estates' compliance status on all cybersecurity tools and follow up remediation actions
- Any other responsibility that may be assigned by the line manager.

Qualification, Experience, Skills and Attributes

- Bachelor's degree in Computer Science, Cybersecurity, Information Technology, or related field.
- At least 1 year of experience in a cybersecurity or SOC role.
- Familiarity with SIEM tools (e.g., Logrhythm, Splunk, QRadar, ArcSight, Sentinel).
- Knowledge of networking protocols, operating systems (Windows, Linux), and security technologies (firewalls, IDS/IPS, antivirus).
- Security certifications such as CompTIA Security+, CySA+, CEH, SSCP, or equivalent
- Understanding of cybersecurity frameworks (NIST, MITRE ATT&CK).
- Strong analytical and problem-solving skills.
- Ability to work in a fast-paced environment.
- Analytical thinking and problem-solving
- Strong attention to detail
- Ability to communicate findings clearly both in technical and non-technical terms
- Knowledge of relevant standards and regulatory requirements

Working model:

- 24/7 shift-based operations (may include nights, weekends, holidays).
- Working on-site

If you meet the above requirements, submit your application quoting the job opportunity you are applying for as subject of your email through the link below by **14th May 2026**. Please include detailed Curriculum Vitae (in Word version or Pdf version not Pdf image), copies of the relevant certificates, testimonials, and daytime telephone contact and email address. **Only short-listed candidates will be contacted.**
